OVERVIEW

The McElroy McSnapper™ is a tensile with impact testing machine designed specifically for polyolefin materials. It was developed to accurately test fusion joints. The McSnapper is designed to meet the ASTM F2634 standard test method for laboratory testing of polyethylene (PE) butt fusion joints using tensile-impact testing.

The machine can be used in the development of new materials, qualify operators, quality assurance for existing materials or in fusion compatibility to determine lot uniformity, strength and fuseability of pipe and fittings.

FEATURES

- Tensile with impact testing machine
- Testing adheres to ASTM F2634
- Provides accurate testing for fused joints
- Testing up to 2.6" pipe wall thickness
