

BETTER INFRASTRUCTURE IN OUR OWN BACK YARD — A GATHERING PLACE IN TULSA

A Gathering Place in Tulsa, a \$400 million park being developed by the George Kaiser Family Foundation, is transforming the Arkansas River waterfront in the most spectacular way. We're proud to say that McElroy machines have played a key role in constructing the underlying framework that will be so crucial to the livelihood of this sprawling, 100-acre park where urban life meets nature.

MCELROY GAINS TWO NEW RENTAL HOUSES FOR POLYPROPYLENE EQUIPMENT

McElroy is pleased to announce two new rental partners for our polypropylene (PP) equipment: Consolidated Pipe & Supply of Lawrenceville, Ga., and R&B Company of San Jose, Calif. These channel partners are expanding their McElroy offerings and will be stocking the complete line of PP tools including the entire Acrobat™ line, the Hornet™, SmartFab™ 125 and Spider™ 125. They will also be offering operator training, service and support with McElroy-trained, certified mechanics and instructors.

“This represents a great trend across the country for increased usage of polypropylene in mechanical systems, strong interest in our expanding product offerings and a general growing acceptance for these new piping systems,” said Brett Stone, McElroy Sales Channel Manager.

ACROBAT™ 180 — THE IDEAL IN-DITCH TOOL

Need to fuse in the ditch? The Acrobat 180 is a great option if you're fusing 63mm to 180mm (2" IPS to 6" DIPS) polyethylene pipe. It fuses the same size pipe as a [Pit Bull® 26](#) but is lighter in weight, making it even easier to place in the ditch and carry from joint to joint. It also offers the advantage of hydraulic power and [DataLogger®](#) compatibility.

It can also convert from 4 to 3 jaws without tools and will go even smaller by removing the base plate to fuse pipe more easily in tight spaces — reducing excavation time.

In more confining areas, the top jaws can be removed completely for easier manipulation around pipe and fittings. A convenient insert design allows an operator to effortlessly change sizes to fit pipe dimensions. The heater and facer can be loaded from either the top or the bottom of the carriage (in the 3-jaw configuration) giving the operator better access and flexibility regardless of the joining challenge.

The versatility of the Acrobat 180 makes it ideal for pipe and fittings with a variety of pressure ratings. It offers consistent butt fusion joints in an economical, reliable package.

FEATURES

- Toolless conversion from 4 to 3 jaws for tight work spaces
- Narrow jaws allowing fusions for flanges to outlet branch of test and most fittings
- Removable upper jaws
- Single insert design
- Comes with two power options — the lighter-weight Acrobat HPU or the more powerful DynaMc® HPU for maximum gauge pressure up to 800 PSI or 1,500 PSI, respectively
- Easy, quick connections to HPU without tools

- DataLogger® compatible
- Industry-leading 5-year warranty

MCELROY AT UA EVENT

McElroy is in Ann Arbor, Mich., this week to support the 64th Annual Instructor Training Program for the United Association of Plumbers, Fitters, Welders and Service Techs. Students took part in a socket fusion apprentice competition using McElroy's heater irons and cold ring tools and Aquatherm PP-R pipe. McElroy is also sponsoring a class and judging.
